OBJECTIVE

Passionate about a challenging career, I seek to join an organization that nurtures my growth, where I can contribute with determination, dedication, and hard work, leaving a lasting impression.

EXPERIENCE

Project Engineer

Sep 2024 - present

VELOCIS SYSTEMS (P) LTD., URSC, Bengaluru

- Installed, configured, and troubleshooted end-user software.
- Provided L1 or desk-side support to users over the phone/email and ensured adherence to process and compliance.
- Patching user applications as per the schedule.
- Configured and managed problems in e-office.

PROJECTS

Online Banking System. Developed a full-stack online banking system with user registration, login, account management, and transaction features using Java, Servlets, JSP, and MySQL.

- **Technologies:** Java, Servlets, JSP, MySQL, Bootstrap, Font Awesome, JavaScript, JDBC, BCrypt
- **Features:**
 - Secure user registration and login with password encryption using BCrypt.
 - Automated account number generation, balance tracking, and account details display.
 - Deposit, debit, and transfer functionalities with transaction history logging.
 - Session management for secure user sessions.
 - Utilized Bootstrap and Font Awesome for a modern and responsive user interface.
 - Integrated MySQL for storing user data, account information, and transaction records.

- [GitHub](#)

Weather Web Application. Developed a weather web application that provides real-time weather information using the OpenWeather API.

- Designed and developed the user interface using HTML, CSS, and Bootstrap.
- Integrated the OpenWeather API to fetch and display real-time weather data.
- Implemented JavaScript functionality to handle API requests and dynamically update the UI.
- Ensured responsiveness and cross-browser compatibility using Bootstrap and CSS media queries.

- [GitHub](#)

Hotel Management System. Developed a comprehensive hotel management system inspired by popular platforms like Swiggy and Zomato. The application facilitates various administrative and customer-facing operations.

- Designed and developed views using JSP and JSTL tags.
- Implemented business logic in Spring MVC controllers.

- Developed entity classes and configured the database.
- Used MVC architecture and DAO design pattern.
- [GitHub](#)

PDF Analyzer (Next.js). Built a PDF analysis application that allows users to upload PDFs and extract specific data based on predefined tags.

- Developed using Next.js for the front-end.
- Implemented file upload functionality to allow users to submit PDFs.
- Integrated a data extraction engine to parse and retrieve specific data based on user-defined tags.
- Focused on a user-friendly interface to ensure smooth interaction with the extraction tool.
